14. CREDIT EXPOSURE CONCENTRATIONS

Credit exposure concentrations are disclosed on the basis of actual exposures and gross of set-offs. Peak end-of-day aggregate credit exposures have been calculated using the Bank's tier one capital at the end of the quarter.

The number of individual counterparties, excluding connected persons, where the period end and peak end-of-day aggregate actual credit exposures, net of individual credit impairment allowances (which were nil), equalled or exceeded 10% of the Bank's shareholder's equity:

- as at 31 December 2014 was nil, and
- in respect of peak end-of-day aggregate credit exposure for the three months ended 31 December 2014 was nil.

Credit exposures to individual counterparties (not being members of a group of closely related counterparties) and to groups of closely related counterparties exclude exposures to connected persons, to the central government of any country with a long-term credit rating of A- or A3 or above, or its equivalent, or to any bank with a long-term credit rating of A- or A3 or above, or its equivalent. These calculations relate only to exposures held in the financial records of the Bank and were calculated net of individually assessed provisions.

15. FIDUCIARY ACTIVITIES

As at balance date the Bank is not involved in:

- The establishment, marketing, or sponsorship of trust, custodial, funds management and other fiduciary activities; or
- The origination of securitised assets; or
- The marketing or servicing of securitisation schemes; or
- The marketing and distribution of insurance products.
